

How to Save Lives: its OFFICIAL Clean Your hands

Awareness is higher than ever following the Covid messaging: Clean care for all – it's in your hands

LONDON, LONDON, UNITED KINGDOM, April 30, 2021 /EINPresswire.com/ -- [HUG](#) is Global

WHO calls on everyone to be inspired by the global movement to achieve universal health coverage (UHC), i.e. achieving better health and well-being for all people at all ages, including financial risk protection, access to quality essential health care services and access to safe, effective, quality and affordable essential medicines and vaccines for all.

Infection Prevention and Control, including hand hygiene, is critical to achieve UHC as it is a practical and evidence-based approach with demonstrated impact on quality of care and patient safety across all levels of the health system.

Clean Hands on the Go

Hand washing is of course one of the most effective ways of preventing the spread of COVID-19 virus. Washing vigorously and frequently with soap and water has been the message throughout the pandemic.

Portable Antibacteria Wipes

Wipes, Sanitiser, Dispensers and Monitors

anti bac Wipes easily reachable in dispenser

But what if you cant access soap and water while you are out and about?

This is where antibacterial wipes and hand sanitizer is essential.

Anti bacteria wipes

We're all now hyper aware of hand and surface hygiene due to the coronavirus pandemic, but confusion remains about exactly what works best and why.

Sometimes on the go you dont have an option but to use what's available and generally quality sanitisers and wipe are equally effective at killing bacteria and viruses if used correctly.

Wipes are used to destabilizing the cells of viruses and bacteria - destroying them. By using them not only on hands but surrounding surfaces gives the best protection against cross contamination.

Stopping the spread of infection is key and ideally wipes should be in a dispenser which itself is

Are all wipes the same?

Ten things you should look for in antibacterial wipes and dispensers

1. Are wipes suitable for hand and surface use?
2. Do they kill AND removing germs & bacteria
3. Are the wipes 100% recyclable or 100% biodegradable?
4. Are wipes tested to ensure no hazardous chemicals?
5. Is the packaging recyclable or biodegradable?
6. Is there a price promise guarantee?
7. Do they have a dispenser containing antimicrobial to further prevent cross contamination?
8. Are they 100% guaranteed?
9. If suitable for hands, are they dermatologically tested?
10. Is the supplier an established manufacturer and wholesaler?

Which is best anti bac wipes or sanitiser

Sometimes on the go you dont have an option but to use what's available and generally quality sanitisers and wipe are equally effective at killing bacteria and viruses if used correctly.

Out and About

Where possible wipes should be taken from a dispenser which reduces the spread of bacteria and viruses by minimising contact.

Overall wipes are the safest and most powerful way of ensuring hands and surfaces are clean and people protected. Wipes not only kill Germs, viruses and bacteria but the also REMOVE and Germs & Bacteria

Cleaning is not just for Coronavirus

Even without a global pandemic for basic hygiene your home and personal items should at least get an antibacterial clean every six months!

Electronics (especially your phone), car, contents of your purse, and keys can all harbour germs and viruses so should regularly be disinfected.
