DrKumo's massively scalable remote patient monitoring solutions feature continuous real-time data analytics and rich visualizations to improve hypertension control and reduce avoidable hospitalizations that are expensive and disruptive for patients as well as the health systems.

[American Heart Association](#) reported that over 42% of US adults will be hypertensive by 2035, an additional 27 million from current projections. Cost projections for hypertension are expected to reach more than \$150 billion by 2035, an additional 80 billion from 2015 figures.

"Our goal is to help reduce the economic burden that stems from avoidable costly hospitalizations,

readmissions, and outpatient visits by integrating the best technologies in an easy-to-use RPM model," said Kelly Nguyen, CEO of DrKumo.

DrKumo empowers patients with hypertension to take their physiological data at the comfort of their homes using medical devices like the blood pressure monitor and transmit data automatically via its intelligent cloud system. This simple yet intelligent data transmission increases patient's adherence to treatment and enables timely intervention before a costly care episode.
