

Sedentary Lifestyles Drive The Anti-Hypertensive Drugs Industry

The Business Research Company's Anti-Hypertensive Drugs Global Market Report 2021: COVID-19 Impact And Recovery To 2030

LONDON, GREATER LONDON, UK, May 5, 2021 /EINPresswire.com/ --

According to anti-hypertensive drugs market research, sedentary lifestyles are a major driver for the growth of the market. Consumption of junk food, lack of proper healthy and balanced diet, lack of proper sleep due to irregular

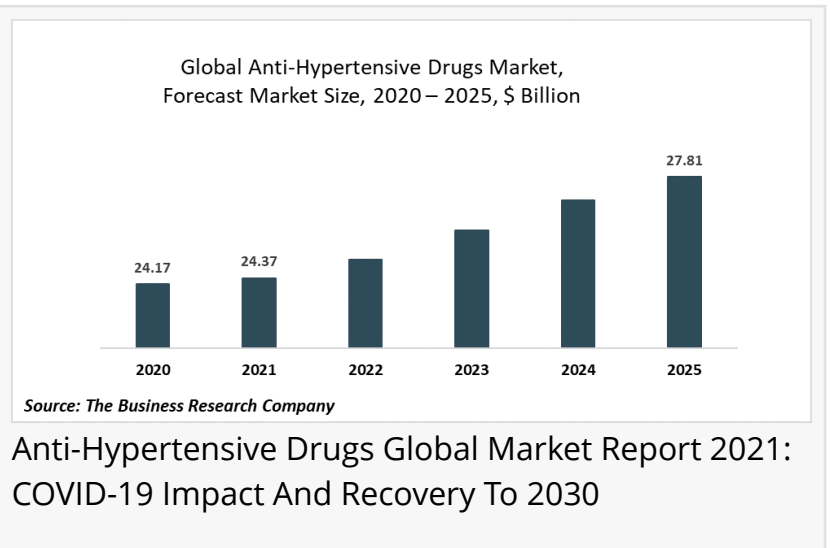

work shifts have contributed to the increase in hypertension. Hypertension is the underlying factor for at least 45% of deaths due to heart disease and 51% of deaths due to stroke. Once the patient is diagnosed with hypertension, patients are required to use the drugs to control hypertension based on the severity of the condition. This creates a sustainable demand for the product and acts as a prominent driver for the growth of the market.

The anti-hypertensive drugs market consists of sales of [anti-hypertensive drugs and related services](#). These drugs are re used to prevent heart failure, kidney failure and acute stroke induced by hypertension. Some of the major anti-hypertensive drugs include diuretics, angiotensin-converting enzyme (ACE) inhibitors, and angiotensin II receptor antagonists.
