Liongard Announces Kaseya BMS Integration Launch

Liongard's newest PSA integration allows MSPs to sync data across customers and systems, making managing your MSP a whole lot easier

HOUSTON, TEXAS, UNITED STATES, May 10, 2021 /EINPresswire.com/ -- Houston-based Liongard, a managed services provider (MSP) automation platform, announced the launch of its integration with Kaseya BMS —a professional services automation solution built for the next-generation of MSPs.

Liongard's Kaseya BMS integration deepens the company's relationship with Kaseya, which already includes integrations with both IT Glue and Kaseya VSA. This latest integration enables MSPs to import companies from Kaseya BMS into Liongard, and to map existing Liongard customer environments to Kaseya BMS accounts. Ticketing is also integrated, ensuring that as issues are discovered by Liongard's Custom Actionable Alerts, a ticket is automatically opened in the PSA. When those issues are resolved, the ticket is automatically closed.

> "
> We are committed to delivering innovative solutions that drive efficiency and help MSPs deliver even greater value to their customers, and this integration with Liongard does just that at scale."
>
> *Mike Puglia, chief strategy officer, Kaseya*

This integration allows MSPs to leverage Liongard's unified visibility and deep insights within the PSA they already use to manage their customers. "We're thrilled to combine Liongard's unified visibility with Kaseya BMS' centralized process management to make managing customers and systems easier," said Matt Miller, VP of Product for Liongard. "Liongard's robust integrations with Kaseya companies enable MSPs to automate processes and scale their businesses faster than ever."

"Our open ecosystem is what allows us to partner with best of breed technologies like Liongard," said Mike Puglia, chief strategy officer, Kaseya. "We are committed to delivering innovative solutions that drive efficiency and help MSPs deliver even greater value to their customers, and this integration with Liongard does just that at scale."

For more information on the integration, see Liongard's Kaseya BMS Guide.

About Liongard
Named Houston's fastest-growing company of 2020, Liongard has defined a new segment focused on unified visibility through automated data aggregation. With automated discovery, Actionable Alerts, documentation and rich reporting capabilities, Liongard unleashes MSP teams to operate at 10x, optimizing their resources and more effectively serving their clients. Known for their user-centric design and constant innovation, Liongard is setting a new precedent for MSP vendors. Their platform's nimble implementation enables teams to integrate automated documentation into their existing workflows for faster insight across all managed systems.
