

Symatri dives into NFT's with the Kala Blockchain

LEHI, UTAH, UNITED STATES, May 10, 2021 /EINPresswire.com/ -- Today, [Symatri](#) launches a brand refresh of their [Kala Blockchain and Coin](#) NFT project. Symatri announces that immediate integration is available for NFT projects in a vast array of industries which include insurance, donation management and reporting, healthcare, agriculture, supply chain, and a myriad of others.

"We are giving all parties involved in a transaction the data integrity and transparency they have always sought for. This kind of interaction between institutions or individuals will create a much more agreeable and better-balanced transactional environment," said Curtis Olayan, COO at Symatri. Multiple integration partners and customers are already praising

Symatri's "Digital Notarization or NFT" framework. As we speak, the [Bitcoin insurance provider Coincover](#) is having their policies hashed (recorded) to the irrefutable Kala Blockchain. In the very near future a direct selling company and an agricultural supply chain business will be hashing records to Symatri's blockchain offering.

“

We are giving all parties involved in a transaction the data integrity and transparency they have always sought for.”

Curtis Olayan

Why the refresh?

Symatri's CMO Aaron Endicott stated, "For years we have understood that there is a huge gap in understanding between blockchain proponents and everyone else. We want to help bridge that gap. To usher in a true blockchain revolution we must help those who are not techy, understand and be a part of the space. Essentially, our

refresh will be an ever-changing, evolutionary process toward that goal.”

Kala brand refresh kalacoin.io

Founded in 2017, Symatri, llc is a pioneer in the blockchain business. The company offers a wide array of blockchain solutions and applications such as Kala and Clear Ledger. Symatri and Company / Products are either registered trademarks or trademarks of Symatri in the United States and/or other countries.
