

ZEUUS Inc. Acquires Groundbreaking Wind Energy Turbine Technology

Ultra-Compact Innovative Wind Turbine Technology Acquired by ZEUUS Inc., More Power and 1/10 the Size

NEW YORK, NY, UNITED STATES, May 13, 2021 /EINPresswire.com/ -- [ZEUUS Inc.](#) (OTC: ZUUS), ("ZEUUS" or the "Company"), a diversified data centric company, announces it has entered into an agreement to acquire innovative vertical [wind](#) turbine technology.

The technology will be part of the Company's ZEUUS Energy Division, which was established in February 2021. After closing, the Company plans to immediately file several patent applications on the design and operation of this unique technology. The Company recently secured a brand new 500Sqm design and R&D facility in Montenegro.

“

Initially we looked at this technology to assist us in reducing our carbon footprint of our energy heavy data centers, however we quickly realized that the product has more far-reaching possibilities”

Bassam Al Mutawa

The Company plans to finalize prototypes by 4th quarter 2021, and then go into full production. “We have not yet decided on the exact location where the product will ultimately be manufactured, however we are in discussions with various governments in the USA and Europe,” said its new VP Operations for ZEUUS Energy, Mr. Andrei Seleznev.

More about the product:

Although designs, pictures, and videos are currently under wraps while the Company secures its technology, extensive testing to date demonstrates optimistic statistics:

□ Compared to its horizontal counterparts, the technology is:

- Is much smaller in size (approx. a 10th of the size) than similar technologies
- Requires minimum amount of wind speeds to work
- Has minimal moving parts
- Has lower production costs
- Generates 10X improved power output relative to its size difference

The technology lends itself to domestic use applications, as well as industrial applications.

Mr. Bassam Al Mutawa, Chief Executive Officer and President of ZEUUS, commented:

"Initially we looked at this and other technologies to assist us in reducing our carbon footprint of our energy heavy data centers, however we quickly realized that this product has more far-reaching possibilities, and we believe it may become a major part of the ZEUUS growth strategy. We are pleased to welcome a group of very talented engineers to our company, they will help us drive this product and strategy forward."

Mr. Bassam continued, "This article in CNBC shows the huge importance governments across the globe are placing on sustainable energy technologies."

About ZEUUS Inc.

ZEUUS has four key divisions that are designed to synergistically address these market opportunities. They are as follows:

- ZEUS Data Centers, will focus on delivering modern and modular state of the art Data Centers, safe, efficient, and cost effective.
- ZEUS Cyber Security, will focus on data protection both inside and outside the data centers of ZEUS by providing end-to-end continuous cyber security.
- ZEUS SOLAAS, Solution-As-A-Service will focus on delivering modern configurable Solution with ready market business focused approach. Two key examples include Secure Cloud Meetings and Blockchain as a business solution to protect and deliver data transparency.
- ZEUS Energy will focus on carbon neutral efficient electrical energy generation based on the power of Water, Wind and Sun. Innovative Immersive Cooling low PUE.

By combining the power of its four divisions, ZEUS can deliver cost-effective sustainable solutions with ongoing growth.

The Company believes that it has strong economic prospects by the following dynamics of the data storage, cloud services, and connected industries, such as data / cyber security, block chain, and crypto mining.
