

# AV-Comparatives says that the Colonial Disaster could have been prevented with Endpoint Security and Patch Management

AV-Comparatives has recently released the results of its Enterprise Main-Test Series. This factsheet report comprises of the findings of the first half year 2021

INNSBRUCK, TYROL, AUSTRIA, May 17, 2021 /EINPresswire.com/ -- Acclaimed independent security software testing platform, [AV-Comparatives](#) has recently released the results of its

Enterprise Endpoint Protection (EPP) [Main-Test](#) Series. This [factsheet](#) report comprises of the findings of the Enterprise Malware Protection Test and Enterprise Real-World Protection Test.

“

By using one of those Enterprise Security Solutions and proper patch management the Colonial Ransomware Disaster could have been prevented. It is important to keep your systems protected and patched.”

*Peter Stelzhammer, co-founder of AV-Comparatives*

reviews will be published in July.

As part of its Enterprise Main-Test Series, AV-Comparatives evaluated as many as 19 enterprise products under Windows 10 64-bit. The products tested are:

By using one of those Enterprise Security Solutions and proper patch management the Colonial Ransomware Disaster could have been prevented easily. The use of security solutions is almost always cheaper than the cost of a successful attack, in this case USD 5 million.

Continuing its impressive work, AV-Comparatives is pleased to announce the release of a new report based on the company's recently conducted Enterprise Main-Test Series. This test series is dedicated to Enterprise products, and the just released factsheet contains the results of the Enterprise Malware Protection Test and Enterprise Real-World Protection Test. Company sources revealed that the complete report with the Performance Test and product

- Acronis Cyber Protect Cloud with Advanced Security pack
- Avast Enterprise Antivirus Pro Plus
- Bitdefender GravityZone Elite
- Cisco Secure Endpoint Essentials
- CrowdStrike Falcon Pro
- Cybereason Enterprise
- Elastic Security
- ESET PROTECT Entry with ESET PROTECT Cloud
- FireEye Endpoint Security
- Fortinet FortiClient with EMS, FortiSandbox & FortiEDR
- G Data Endpoint Protection Enterprise
- K7 Enterprise Security Advanced
- Kaspersky Endpoint Security for Enterprise – Select, with KSC
- Malwarebytes EDR
- Microsoft Defender Antivirus with Microsoft Endpoint Manager
- Panda Endpoint Protection Plus on Aether
- Sophos Intercept X Advanced
- Viper Endpoint Cloud
- VMware Carbon Black Cloud Endpoint Standard

“In Enterprise environments and with Enterprise products in general, it is usual for products to be configured by the system administrator, in accordance with vendor’s guidelines, and so we invited all vendors to configure their respective products. Only a few vendors provide their products with optimal default settings which are ready to use and did therefore not change any settings.” said AV-Comparatives co-founder Peter Stelzhammer.

The report provides a brief overview of the results of the Enterprise Real-World

Protection Test run carried out in March and April 2021. A test set consisting of 373 test cases (such as malicious URLs) was used to arrive at the results.

The Malware Protection Test was conducted to evaluate a security program's ability to protect a system against infection by malicious files before, during or after execution. 1,008 recent malware samples were used for this test. A false alarm test with common Enterprise software was also performed. All tested products had zero false alarms on common Enterprise software.
