

Calimex USA signs a new project to custom-develop and host a Blood Inventory and Distribution Application

The new application will be similar to our FDA approved eOrders - www.eBloodOrders.com

SAN FRANCISCO, CALIFORNIA, USA, May 19, 2021 /EINPresswire.com/ -- [Calimex USA](#) is very pleased to announce the signing of new project to custom-develop and host a Blood Inventory and Distribution Application for a large listed company in California.

Calimex USA conducted a business analysis to arrive at a detailed User Requirement Document (URD) for our customer. The new application will be developed to meet all the requirements in their final, client-approved URD. The developed application will conform to FDA-recommended guidance to best practices in documentation and processes, including validations.

This includes Installation Qualification (IQ), Operational Qualification (OQ) and Production Qualification (PQ). It will also include a Risk Traceability Matrix (RTM).

The developed application will be securely hosted in our cloud, in a high-availability mode. The hosting will be in two different geographical locations within the US, with continuous replication for Disaster Recovery (DR) and Backups.

The new application will be [similar to our FDA approved eOrders](#). Please visit our www.eBloodOrders.com if you are interested to learn more.

We welcome new businesses.
