In lieu of the recent Squarespace platform change from 7.0 to Squarespace 7.1 sites, users are vulnerable to issues in import/export of collection. Thus, to further support the Squarespace users over the long term, 'Square Website' has announced to turn to a subscription-based model from product purchase model. This shift aims to empower the users to make the most out of the Squarespace platforms, which frequently undergo updates that require code changes to the plugins.

According to the founder of Squares Websites, while the purpose behind frequent updates is to allow users to stay on the cutting-edge of Squarespace API technology, the product purchase model acts as a barrier to gain the utmost advantage of the updated platforms. Thereby, the subscription-based model will allow extended support for Pages and List Collections like Blog, Gallery, Album, Events, or Custom (Dev) collections, including content inside, all without fretting over the frequent changes of Squarespace platforms.

The founder further explained that the subscription-based model is also essential to bolster the connection with service end-users. "The prime vision behind the subscription-based model is to provide support to our users. Additionally, to keep plugins functioning adequately, there are ongoing costs we must share with our worthy customers, which this payment model makes easier to do."

In this new subscription-based model, there will be only ONE Squarespace chrome extension but with LITE and PRO licenses. The LITE license, priced at $5/month or $50/year. This specific license enables users to import and export between Squarespace 7.0 and Squarespace 7.1 sites with some additional tweaks.

While PRO Licence $18/month $160/year incorporates an array of features for users to relish, including:
- Import/Export Collections (7.0, 7.1)
- Admin UI Tweaks plugin
- Lazy Summaries plugin
- Advanced Maps plugin
- Custom Tables plugin
- Content Presets plugin
- Nav Filter, Delete Demo plugins, and much more...
