level of integration, presenters can be confident they can access content quickly and easily for their audience”, says Colin Doe, COO of Vizetto, “it also means that once the presenter has logged out of the IWB, their content is securely saved back to their originating One Drive location, and wiped from the IWB’s cache.”

The addition of One Drive integration to Reactiv SUITE was a result of customer requests for easy access to their corporate cloud repositories. “We continue to add features and benefits that our customers request in our ongoing effort to ensure the best user experience for on-premise

and remote meeting spaces,” says Av Utukuri, Founder and CEO of Vizetto, “Reactiv SUITE for IWB is a premium meeting product that helps presenters engage with meeting attendees to make their meetings memorable.”

Global changes to the way people and organizations work, due to the pandemic, are accelerating the adoption of hybrid meeting tools like Reactiv SUITE as meetings, education and conferences start to return to an in-person and remote experience.

Reactiv SUITE is an eco-system of software products designed to make hybrid meetings memorable and engaging. The software allows any presenter to share their content in a non-linear fashion, visually markup documents, fluidly pull up content and media, engage in discussions with remote participants, and elevate their presence so they stand out.
