

Restflix Has a Growth Spurt, Announces Crowdfunding Campaign

The science-backed streaming service that has revolutionized the sleep-aid market is in need of funds for product innovation and international expansion efforts

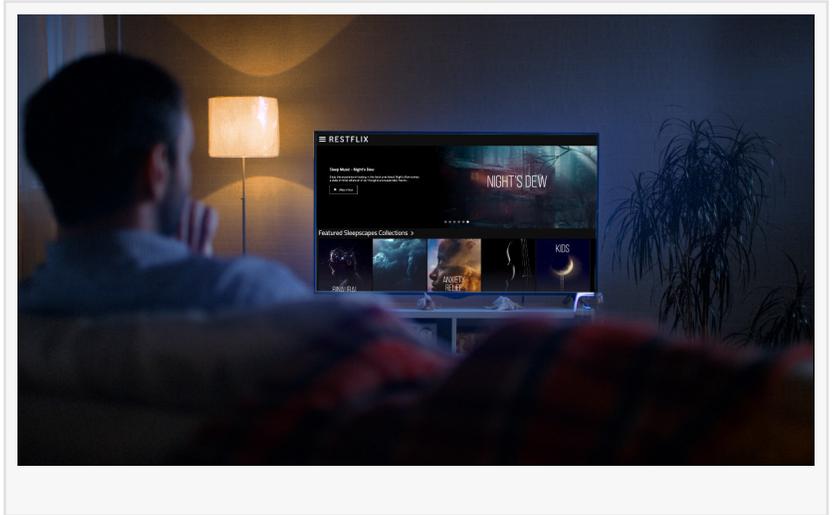

SARASOTA, FLORIDA, UNITED STATES, June 1, 2021 /EINPresswire.com/ -- [Restflix](https://www.restflix.com/), a science-backed streaming service named the 'Best Sleep App to Drift off to' by Livestrong, has announced its new crowdfunding campaign created to help fund the company's massive growth. Featured on CNN, Rachael Ray, Entrepreneur, Good Morning America and more, there are increasing demands for access to the app all over the world, for which the company will need outside capital.

Using the latest sleep-enhancing methods, Restflix provides users with calming sleepscape visuals, soothing binaural beats, sleep meditations, bedtime stories and more to ease users into new sleep patterns, combat insomnia, and improve overall health. To date, Restflix has been an entirely bootstrapped organization. The team is now raising funds to support expansion and continued growth. The proceeds of the crowdfunding round will be used to turbocharge growth by

investing in product innovation and international expansion.

"Since our inception, we've had multiple users reaching out wanting to invest. Today's the day for those who have followed Restflix closely to be able to invest and join in the next stage of our amazing journey," said Kevin Hillman, founder and CEO of Restflix. "We're customer-obsessed, so it should come as no surprise that this campaign has been all about our customers. We simply wouldn't be where we are today without them."

Hillman founded Restflix in June 2020. In the face of a global pandemic and civil unrest, Hillman, who is also a father of two young boys, consistently struggled with achieving productive and restful sleep.

"As an insomniac myself, I built Restflix to solve a problem I understood on a personal level," said Hillman.

"I truly believe that you need to completely buy into any solution that you plan to bring to market. In other words, being a user yourself is essential to success. I use Restflix nightly and am thrilled to be able to help others who share the same problem."

Restflix uniquely leverages proven and exciting technology and binaural beats to harness the brain's responsiveness to sound. By doing so, Restflix's videos can effectively alter the brain's degree of arousal. The company has worked with Doctors and other sleep professionals in the space to produce original content for the app. All of the content is created to help users fall asleep faster and stay asleep longer. As the Restflix team progresses with its crowdfunding efforts, the team plans on furthering the development of its streaming service to enhance the overall user experience.

"Our vision is to create an unparalleled sleep experience that helps people across the world access better and deeper sleep. We couldn't be more excited about this journey," said Hillman.
