

# Rise In Number Of Ovarian Cancer Cases Leads To Growth In The Gynecology Drugs Industry

*The Business Research Company's  
Gynecology Drugs Global Market Report  
2021: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK, June 1, 2021 /EINPresswire.com/ -- The rise in number of women suffering from ovarian cancer would drive the growth of the global gynecological drugs market. For instance, according to Globocan, it is estimated that the global incidence of ovarian cancer will increase from 295,414 in 2018 to 434,184 by 2040. This increasing incidence of ovarian cancer would boost the market for gynecological drugs in the forecast period.

The main types of therapeutics in gynecology drugs are hormonal therapy and non-hormonal therapy. Hormonal therapy is a treatment that adds, blocks, or removes hormones to slow or stop the growth of cancer cells that need hormones to grow. Non hormonal therapy involves the usage of anti-infective, anti-inflammatory agents, lubricants, moistures, antidepressants, gabapentin, clonidine and others. Gynecology drugs are used for gynecology cancers, menopausal disorder, polycystic ovary syndrome, contraception and others and distributed through hospital pharmacies, retail pharmacies and online pharmacies.
