

# Starch Derivatives Industry Grows With Demand For Convenience/Processed Food

*The Business Research Company's Starch Derivatives Global Market Report 2021: COVID-19 Growth And Change*

LONDON, GREATER LONDON, UK, June 2, 2021 /EINPresswire.com/ -- The growing demand for convenience and processed food is expected to fuel the growth of the [starch derivatives market](#) in the forecast period. Convenience food and processed food is a tertiary packaged food or food that is intended to reduce consumer time in the

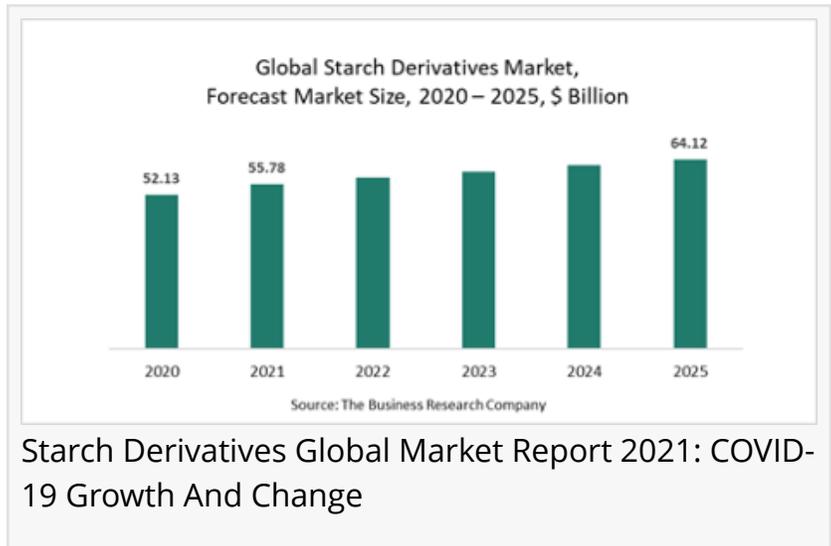

kitchen, lower expenses related to wastage, and minimize costs by economies of scale. Over the years, starch derivatives have appeared as a key successful environmentally friendly product, acting as a binding and gelling agent. There has been a significant rise in the demand for starch throughout the food and beverage sector due to rising sugar values. For instance, the global processed snacks market is expected to increase from \$96.9 billion in 2020 to \$142.0 billion by 2025. Therefore, the growing demand for convenience and processed food drives the growth of the starch derivatives market.

The starch derivatives market consists of sales of starch derivatives by entities (organizations, sole traders and partnerships) that manufacture starch derivatives. A starch derivative is defined as modified starch, prepared by chemically processing inhabitant starch to alter its qualities. It is used for flocculation, adhesion, acid stability, process tolerance advancement, pH stability enhancement and shear stability in various industries.
