

# Global partnership announced between Schneider Digital and DAT/EM Systems International

*DAT/EM software and Schneider Digital photogrammetry hardware products combine into the most precise and productive stereoscopic data capture environment.*

MIESBACH, BAYERN, DEUTSCHLAND, June 2, 2021 /EINPresswire.com/ -- Anchorage/Miesbach in May 2021 – The software producer DAT/EM Systems International of Anchorage (USA) and the 3D hardware specialist Schneider Digital from Miesbach (Germany), have announced a global partnership agreement for the distribution of the latest 3D stereoscopic vision technology from Schneider Digital to all DAT/EM customers around the globe. Under this cooperation from now on, DAT/EM partners worldwide can directly distribute to their clients the [3D PluraView stereo monitors](#) and Schneider Digital Workstations as complete photogrammetric workplace solutions.

The dual-screen, passive stereo 3D PluraView systems are 100% compatible to all DAT/EM products, including the flagship Summit Evolution Professional digital stereoplotter.

“The combination of the state-of-art [3D PluraView displays](#) with the Summit Evolution software provides the clearest visualization of stereo imagery for photogrammetrists worldwide”, said Jeffrey Yates, General Manager of DAT/EM Systems International. “The increased visual acuity allows map compilation to be more productive with greater accuracy”.

The dual-screen, passive stereo 3D PluraView systems are 100% compatible to all DAT/EM products, including the flagship Summit Evolution Professional digital stereoplotter. DAT/EM software and Schneider Digital photogrammetry hardware products combine into the most precise, productive and user-friendly stereoscopic data capture environment with unparalleled display quality and fastest response times to work even with terabyte-sized imagery.

“We have been working very closely with DAT/EM International and DAT/EM Europe for many years and have built a trusted relationship which benefits our joint user community in the area of [GEO-IT applications](#)”, said Josef Schneider, the CEO and founder of Schneider Digital. “Together with DAT/EM on the software side, our objective always was and always will be to provide the best functionality and quality for the photogrammetry workstations and 3D PluraView monitors that we manufacture”. For the user, this means a completely homogeneous and integrated 3D stereo workstation solution with perfectly coordinated hardware and software components.

About DAT/EM Systems International:

DAT/EM Systems International, located in Anchorage, Alaska, USA, has been developing photogrammetric software since 1987. DAT/EM specializes in 3D stereo viewing and feature data collection software. Its products include the Summit Evolution digital stereoplotter and proprietary capture interfaces that allow Summit Evolution to digitize directly into MicroStation®, AutoCAD®, ArcGIS® or Global Mapper®. For more information, please visit DAT/EM's website at <https://www.datem.com/> or email [sales@datem.com](mailto:sales@datem.com).
