

# Prefilled Syringes Market Sees Growth At Rate Of About 21% Through 2021 Due To COVID-19 Vaccinations

## Vaccinations

*The Business Research Company's  
Prefilled Syringes Global Market Report  
2021: COVID-19 Implications And  
Growth*

LONDON, GREATER LONDON , UK, June 9, 2021 /EINPresswire.com/ -- The global [prefilled syringes market](#) size is expected to grow from \$5.78 billion in 2020 to \$7.29 billion in 2021 at a compound annual growth rate (CAGR) of 20.74%. The exponential prefilled syringe market growth is mainly due to the companies catering to the growing demand for COVID-19 vaccines that require pre-filled syringes. The pre-filled syringes market is expected to reach \$11.18 billion in 2025 at a CAGR of 11.30%.

Prefilled Syringes Market Report 2021: COVID-19 Implications And Growth

High demand for prefilled syringes to administer COVID-19 vaccines is expected to boost the prefilled syringes market during the forecast period. Prefilled syringes are being preferred for administering COVID-19 vaccines to reduce the risk for needle stick infections. To cater to the growing demand for administering COVID-19 vaccines, the companies are focusing to increase the production of prefilled syringes. For instance, in May 2020, the US Department of Defense awarded a contract of \$138 million with Apiject Systems America for “Project Jumpstart” and “RAPID USA,” to facilitate the production of prefilled syringes for the coronavirus vaccine. Project Jumpstart supported the supply chain for prefilled syringes that manufacture 100 million prefilled syringes. The contract also accelerated the launch of RAPID USA to facilitate the production of 500 million prefilled syringes by 2021. Thus, the high demand for prefilled syringes intended for the administration of COVID-19 vaccines is expected to fuel the market growth during the forecast period.
