Launches a 2-in-1 Phone Security  
Solution

Sirin Labs (Kazakhstan's investor [Kenes Rakishev](#)'s company), the maker of the SOLARIN and FINNEY, announces its 2-in1 [SIRIN V3](#) launch on June 2021. The secured dual persona SIRIN V3 offers two highly secured systems in one device. More so, Sirin Labs said in an official statement, it will be built on the Samsung Knox mobile security platform.

Sirin V3™ employs a multi-layered cyber security suite which includes a behavioral-based and machine learning Intrusion Prevention System (IPS), for proactive cyber protection in real-time.

Sirin V3™ is based on Samsung's latest business class devices with multi-layered platform built into the hardware and software of each device. The secured platform constantly verifies the integrity of the device through a chain of security checks that begin at the hardware level and extend to the operating system, and detects any tampering to ensure your data is always secure. 'Personal' is absolutely separated from 'Workspace'.

Kenes Rakishev, Co-Founder of Sirin LABS: "Sirin Labs has always strived to bring highly secured smartphones to truly protect user data, with the announcement of our third-generation secure communication solution, SIRIN V3 we're packing two phones with unbeatable security into a single unit."

The Sirin V3™ solution with its Dual-Persona solution incorporate two totally separated and

protected zones. Personal space ( on the left) for the user to install apps from Google Play Store only for his own personal usage. Secured space ( on the right) – a highly secured and encrypted partition. In this space no apps can be installed except for the pre loaded apps. It contain military grade anonymous encrypted call app ( end to end ).

The sales of the new device start in June 2021. Customers can preorder it on the company's website.
