

The Secret To Creating Cinematic Content With PowerVision S1

SAN FRANCISCO, CALIFORNIA, UNITED STATES, June 4, 2021

[/EINPresswire.com/](https://www.einpresswire.com/) -- The Secret To Creating Cinematic Content With PowerVision S1

The technological advancements of smartphone specifications now enable consumers to produce cinematic-looking scenes. Optimizing the features of a device and combining this with the right accessories is the key to achieving stellar shot quality. The PowerVision team shares with us their top 4 tips in creating cinema-worthy content.

Start With Why

When starting a project, it is crucial to first identify the goals of your output and the target audience. This will result in a user experience view, which will help shape the content planning process to resonate best with your viewers. Starting with your why will help pinpoint the necessary action steps and what needs to be highlighted.

Map Out Your Shoot Sequence

This step can potentially save you a lot of time during the day of the shoot, as the scenes are already defined, and all that is needed is proper execution. It's essential to have alternative shot ideas in case the results do not come out as

previously envisioned. Determining your sequence will reveal the props you may need to get that perfect shot.

Find The Right Light

Lighting is key to getting crisp, clean, and detailed outputs. For the cinematic effect, it's advisable to utilize the maximum amount of natural light as the final pictures then come out looking softer. Ensure to check the weather forecast on your ideal shoot day to confirm if this is indeed the best time to film.

Invest In The Best

Looking to power up a mobile device's functionalities even further? Check out this game-changing innovation from PowerVision! [The PowerVision S1](#) offers an all-in-one solution solving stabilization, charging, stand, and protection needs in a compact format. It's mini but powerful and a perfect companion for most smartphones.

The
PowerVision S1
The perfect companion for smartphones

Color it your way
The S1 has a variety of magnetic phone cases that come in different colors.

The perfect shot
The gimbal feature is paired with a 3-axis stabilizer and is accompanied by the PowerFollow AI tracker to make sure you're always in frame.

Mini but powerful
It's compact and fits right in your pocket.

Stand strong
With small but powerful feet, this accessory is perfect as a tripod!

Stay on
This perfect on-the-go companion has a built-in wireless powerbank, so you don't have to get all wired up!
