

3 Exclusive Speaker Interviews Released ahead of Microbiology West Coast Virtual Conference in 2 weeks

SMi Group reports: Key microbiology speaker interviews released ahead of SMi's 4th Annual Microbiology West Coast Conference, taking place in two weeks.

SAN DIEGO , CA, UNITED STATES, June 4, 2021 /EINPresswire.com/ -- SMi Group had the opportunity to speak with three featured expert [microbiology speakers](#) to discuss some of the difficulties presented in the industry and strategies that are implemented to overcome them. It's imperative for microbiologists and leaders from all areas of pharmaceuticals, biologicals, cleanroom, microbiology and contamination industry experts to stay on top of the latest advancements, technologies and processes related to microbiology.

SMi Presents the 4th Conference...

Pharmaceutical Microbiology West Coast

Novel approaches and best practices for tackling current industry contamination control challenges

JUNE
17 - 18
2021
Virtual Conference

#SMiPharmaMicroWC

www.pharma-microbiology-usa.com

Industry experts will be gathering to represent top organisation and share their insights at the [Pharmaceutical Microbiology West Coast](#) event taking place on June 17th and 18th 2021, as a virtual conference with online access only.

Interested parties can register now at US\$499 for pharmaceutical and biotechnology firms and US\$999 for vendors and commercial firms at <http://www.pharma-microbiology-usa.com/PR5>

The following are excerpts from the [three exclusive microbiology experts](#):

What is the greatest challenge for you to personally overcome within the pharmaceutical microbiology field currently?

"ATMPs force us to develop new CMC strategies and to re-evaluate well established micro concepts. The future of pharmaceutical microbiology lies in the close collaboration with process development and manufacturing. We have to be more than just a testing lab."

Friedrich von Wintzingerode, QC Lead iNeST Project (Individualized Neoantigen Specific Therapy)
Genentech, Inc.

The pharmaceutical microbiology industry has matured significantly in previous years, what key developments have you witnessed in the last year within the field?

I have seen a great focus on automation and digitization in recent years. There is increased collaboration in the industry to find flexible solutions to drive forward rapid microbial methods coupled with advanced data analysis and automation to get results faster and in turn, make decisions quicker."

Lynn Johnson, Principal Scientist, Takeda

How would you like to see the pharmaceutical microbiology market develop in the future and where do you think the biggest growth area will be in the next few years?

"The biggest growth area in the next few years will be to move away from traditional compendial methods and implement real time methodology on the shop floor."

Christine Massaro, Director, Sterile & Microbiology Quality Assurance, Organon

Join industry experts to discuss the latest topics and pressing challenges in this field. The updated brochure is available on the conference website, visit <http://www.pharma-microbiology-usa.com/PR5>

The conference is sponsored by: Associates of Cape Cod, bioMérieux, Lonza, METTLER TOLEDO, and Microcoat
