

Eclipses Partners with Coforge to Offer a New Solution for Data Endpoint Vulnerabilities

NOIDA, INDIA, June 9, 2021 /EINPresswire.com/ -- Eclipses has partnered with Coforge, a leading global IT solutions organization that enables its clients to transform at the intersect of unparalleled domain expertise and emerging technologies to achieve real-world business impact. Today, their proprietary platforms power critical business processes across the insurance, financial service, and travel industries.

The Coforge and Eclipses partnership was formed to help bridge the way organizations secure their data. Eclipses' MTE technology offers an innovative way to protect data moving between endpoints. This disruptive technology, revolutionary in both speed and accessibility, gives clients access to the highest level of security available today, safeguarding even the most vulnerable data from cyberattacks.

Eclipses' CEO Bryan Champagne states, "We are excited to be partnering with Coforge, as we know our MTE technology will serve their clients greatly and will significantly impact the way data security is managed. Protecting sensitive data from cyberattacks has always been our top priority and we are confident our MTE technology has redefined data security to keep sensitive information protected for not only today – but tomorrow's cyber threats."

Coforge and Eclipses' joint solutions leverage Eclipses' cutting-edge MTE cyber technology as it has proven to be one of the most advanced and unique data security solution for all IoT devices and mobile application technologies. By combining Coforge's services expertise and Eclipses' MTE technology, Coforge will help clients accelerate the pace of new innovations and fast-track their digital transformation. Together, Eclipses and Coforge bring the set of proven capabilities that help reinvent organizations to meet the needs of the digital future.

Sudhir Singh, CEO of Coforge said; "Recent studies suggest that many companies possess data that is unprotected and vulnerable to loss. Cybersecurity awareness, best practices and prevention are the key weapons in the fight against malicious intent. We remain committed to our clients and are making all efforts to ensure their applications and data are secured. We are excited to partner with Eclipses and seek to leverage their MTE technology to enable our clientele with a safe data environment from current and future threats."

About Eclipses

Eclipses sets the new standard for protecting your most sensitive data while in transit.. Their

disruptive technology, MicroToken Exchange® (MTE), offers a transformative cyber security solution to replace actual data with instantly obsolete, meaningless random streams of values. Eclipses developed the MTE technology to be the most innovative and disruptive security solution for protecting data communication for IoT devices, mobile applications and web applications. The MTE technology, revolutionary in both speed and accessibility, gives clients access to the highest level of security available today, safeguarding even the most vulnerable data from cyberattacks. Eclipses has submitted FIPS 140-3 CAVP requirements resulting in the award of validation certificates for all their algorithms.
