

Razorvision Consulting and NXTsoft Partner to Drive High-Margin Digital Lending Growth

Razorvision Consulting, the digital lending technology expert, is pleased to announce a strategic partnership with NXTsoft, the leader in API connectivity.

AUSTIN, TEXAS, USA, June 9, 2021 /EINPresswire.com/ -- [Razorvision Consulting](#), the [digital lending](#) technology expert, is pleased to announce a strategic partnership with NXTsoft, the market leader in API connectivity.

Razorvision Consulting's [Fast Cash](#) is a bundled service that allows customers to deliver a fully customized digital lending solution with the speed and cost-effectiveness of a boxed solution. Through this partnership with NXTsoft, Razorvision's customers can integrate Fast Cash with their core system in as little as 90 days and begin offering a fully customized digital lending experience to applicants.

"The demand for unsecured digital lending is growing at a rapid rate," Razorvision Consulting CEO Don Isbell said. "Consumers are abandoning financial institutions for alternative lenders who offer a better customer experience and faster funding. While out-of-the-box lending software promises speed to market, it can be clunky, error-prone and difficult to implement. Building custom lending solutions can be expensive and challenging to integrate with core banking systems. Razorvision and NXTsoft's partnership will expeditiously facilitate the seamless integration of Fast Cash with a financial institution's core provider, empowering the financial institution to easily deliver a high-quality, fully-customized digital lending experience to their customers."

NXTsoft has been in API market space for over 25 years and has over 1,000 financial institutions that currently utilize its OmniConnect secure API solution to transmit data real-time between core systems and ancillary applications.

"NXTsoft is pleased to partner with Razorvision in their goal to help financial institutions

transform the digital lending experience, said David Brasfield, CEO of NXTsoft. "The combined solution of OmniConnect and Fast Cash expedites core connectivity, allowing financial institutions to get started with an excellent lending experience quickly and cost-effectively."

Advantages include:

Instantaneous consumer access to funds upon approval

Seamless recording of loans into the core

Auto-updated ledger and treasury reports

Auto AML and BLS scans
