Gynecology Medical Lasers Global Market
Report 2021: COVID-19 Growth And
Change To 2030*

LONDON, GREATER LONDON , UK, June 11, 2021 /EINPresswire.com/ -- Rising obesity is expected to drive the gynecology medical devices market. Overweight women have a higher incidence of gynecology disorders. Overweight and obese women are at high risk of reproductive health-related

issues. They have a higher risk of infertility, conception rates, miscarriage rates, and increased risk for pregnancy complications. They have poor reproductive outcomes in natural as well as assisted conception. Increasing obesity in women across the globe is driving the demand for gynecology treatment, hence driving the [gynecology medical lasers market](#).

The global gynecology medical lasers market is expected to grow from \$0.19 billion in 2020 to \$0.19 billion in 2021 at a compound annual growth rate (CAGR) of 0.5%. The slow growth is mainly due to deferring treatments that led to fall in the demand comparatively for the equipment. The gynecology medical lasers market is expected to reach \$0.79 billion in 2025 at a CAGR of 42%.
