

Registration Opens for Energy from Waste Conference 2021

SMi Group's Energy from Waste conference will return to London for its 14th year this December

LONDON, LONDON BRIDGE , UNITED KINGDOM, June 14, 2021

/EINPresswire.com/ -- SMi Group are pleased to announce the return of their [Energy](#) from [Waste](#) conference, which will return to London for its 14th year on 1st – 2nd December 2021.

The graphic features a dark blue background with a night-time photograph of an industrial facility, likely a waste-to-energy plant, with its lights reflecting on water. The text is centered and reads: "SMi Presents the 14th Annual... ENERGY from WASTE 2021 London, UK Virtual Option Available". A yellow-bordered box in the top right corner contains the dates "1st - 2nd DEC 2021". The website "www.efw-event.com" is visible in the bottom right corner of the image area.

Due to the current political [climate](#), the

Energy From Waste industry is changing dramatically. This years, conference agenda will explore how technological innovations and new policy are assisting the growth of the Energy from Waste market in a decarbonised world.

Building on the success of last year, the 2021 event will bring together international waste management operators, developers, private equity financiers, technology providers and industrial end users to discuss the most crucial topics within Energy from Waste.

Interested parties should register by June 30th to take advantage of the £200 early bird discount: <http://www.efw-event.com/einpr1>

Highlights for 2021 Include:

- Learn of the growing significance that Carbon Capture and Storage has within the Energy from Waste market and the impact it has on the circular economy
- Witness Case studies giving updates on the challenges and opportunities from Energy from Waste projects in the UK, Poland, Thailand, Norway and Serbia
- Gain an in depth understanding of the opportunities that CCS technology has for Energy from Waste industry
- Discover how to maximise value and optimise investment returns from energy from waste projects
- Determine where the key regions for future Energy from Waste growth will be
- Uncover the effects that the Waste Incineration BREF has had on the EFW market one year on

- Understand what technologies are available to ensure EfW plant optimisation and life extensions of aging facilities
