

Greenpenny Expands its Solar System Lending Services into Missouri

Greenpenny expands its renewable energy financing services into Missouri to help communities power their homes, businesses, non-profits, and farms.

Greenpenny is a virtual carbon-neutral bank dedicated to financing a sustainable tomorrow.

MISSOURI, UNITED STATES, June 16, 2021 /EINPresswire.com/ --

Greenpenny announced the expansion of its [renewable energy financing services](#) into the state of Missouri. The move allows greenpenny to help communities in Missouri finance solar energy systems to power their homes, businesses - small and large, non-profits, and farms.

“

At greenpenny, we strive to make it easy to adopt solar energy generation by offering fast, easy, and affordable financing to help buyers make smart investments in their property. ”

*Jason MacDuff, greenpenny
V.P.*

Why Solar?

“We know that many Missourians view renewable energy as a vital link to tackling fiscal and environmental issues,” says greenpenny V.P., Jason MacDuff. “At greenpenny, we strive to make it easy to adopt solar energy generation by offering fast, easy, and affordable financing to help buyers make smart investments in their property. Whether the appeal of solar systems is their climate stewardship, economic benefits - or both - greenpenny is here to help finance projects in Iowa, Illinois, Minnesota, Wisconsin, and now Missouri.”

The combination of federal tax incentives and competitive financing terms makes converting to solar through greenpenny’s lending services comparable to swapping a monthly utility bill for a solar system loan payment. Once the loan is paid in full, potential exists for meaningful savings.

“We’re committed to keeping our lending rates and terms reasonable for our borrowers,” said MacDuff. “In this way, we hope to encourage significant solar energy adoption at an affordable cost, while providing for a more breathable planet.”

Where You Bank Matters

People across the nation can also bank with virtual, carbon neutral greenpenny. Customers

enjoy competitive rates, features and experiences with greenpenny's Checking and Savings Accounts, and CD's. Money deposited in greenpenny is secure, earns interest, and is only used to finance renewable energy projects like solar – no fossil fuels. Customers open accounts online and access hi-tech online and mobile banking platforms with zero ATM fees worldwide – ever! And greenpenny bankers are just a phone call away at 888-GPENNY0 (888-473-6690).

"Financing a sustainable tomorrow is the sole mission of greenpenny," added MacDuff. "The more people with us on our mission, the more we can do our part to create a more sustainable environment together."

For additional information on residential or commercial solar systems financing, or banking services, please visit greenpenny.com or dial 888-GPENNY0 (888-473-6690).

About greenpenny
