# Adora POS' Cloud-Based POS Helps Restaurants in Enterprise Management

An industry leader in restaurant POS solutions has a one-of-a-kind enterprise management system.

ROSEVILLE, CALIFORNIA, UNITED STATES, June 15, 2021 /EINPresswire.com/ -- Representatives with Adora POS announced today that its cloud-based POS helps restaurants in enterprise management.

"Our cloud-based POS helps restaurants in enterprise management with customizable control, which means your POS is uniquely yours: Menu items, order screen layout, discounts, employees, inventory, and customers can all be controlled from our centralized, streamlined system," said Kevin Wendland, President and spokesperson for Adora POS.

Wendland explained that users are never too far away with Adora restaurant POS software.

"Access your POS anytime, anywhere — all you need is an internet connection," Wendland revealed before adding, "There's a lot on your plate: We can help with store level and chain-wide consolidated dashboards and reporting. We'll automatically email you key metrics too."

But that's not all. Adora POS also helps restaurants keep track of inventory through its inventory management system. The key features of Adora POS's Inventory Management System give restaurants the ability to assess inventory across locations; manage multiple vendors and stay on top of inventory over time.

"Our centralized inventory database allows you to count inventory by list or location, as well as transfer items between stores," Wendland said, before adding, "Chain-wide vendors lists mean you can receive the same item from different vendors with no added stress.

With Adora's point of sale system for restaurants, Wendland pointed out that restaurants can manage perpetual inventory, as well as ideal versus actual tracking and reporting.

Having access to Adora POS's enterprise management system and inventory management system comes on the heels of the company's unveiling its Kitchen Display System (https://adorapos.com/services/#kitchen_display_system), which automatically prioritizes orders based on order type and will put rush orders at the top of the Make List. Its kitchen display system lets.

Wendland went on to point out that it is also offering three customizable subscription plans for its POS for restaurants. They include: Core POS, starting at $59 per month; Core POS Online, starting at $74 per month, and The Kitchen Sink, with flexible pricing.

Those interested in the packages can visit Adora POS's subscription plans page (https://adorapos.com/pricing/) on its website for in-depth details and a breakdown of each plan.

In addition, Adora POS now integrates with popular food delivery and accounting apps. The popular food delivery and accounting apps in which Adora POS integrates include:

• UberEats

• GrubHub

• DoorDash

• DoorDash Drive

• Cliq

• Compeat

• Worldpay Gift Cards

• Valutec Gift Cards
