

BVM Now Helping Med Spa in Pittsburgh Rank High in Google

An industry leader in SEO is now helping one of the nation's top med spas rank high in the search engines.

HOUSTON, TEXAS, UNITED STATES, June 16, 2021 /EINPresswire.com/ -- Representatives with Brazos Valley Marketing ([BVM](#)) announced today that it is now helping a Pittsburgh-based med spa rank high in Google.

"Search Engine Optimization (SEO) is vitally important for any business to rank high in Google, and it is a pleasure for us to help this med spa beat their competition by ranking high in the search engines," said Dustin Ogle, founder, and owner of BVM, a company that has historically provided Search Engine Optimization (SEO) services to businesses in 11 cities in Texas (Austin, Dallas, El Paso, Fort Worth, Frisco, Houston, Lubbock, Plano, San Antonio, Sugar Land, and The Woodlands).

The Pittsburgh-based company that BVM is helping rank high in the search engines is a group of clinicians and medical professionals, local to Pittsburgh, who believe in self-care, beauty, and confidence. The company believes that individuals have the power to look as good as they feel. With its anti-aging treatments and beauty services, this med spa gives people a chance to revitalize and refresh their looks.

In addition, BVM is also helping managed I.T. service providers in Texas rank high in the search engines. Managed I.T. service providers planning to rank high in the search engines or any business in Texas interested in the free SEO consultation can call (713) 909-3351 today.

But that's not all. BVM is also now providing free custom Search Engine Optimization (SEO) consultations to businesses in Texas.

Ogle explained SEO is important for small businesses because well-optimized sites receive increased traffic over time, which results in more leads and sales. Without SEO, searchers won't

be able to find the small business website.

SEO is no longer about manipulating search algorithms for rankings on the first page. Recent data shows that more than ever before, search engines are on the upward trend towards identifying websites that provide a useful, educational, or entertainment experience, basically to where the users of the site and users of Google are satisfied with real content.

“We are helping this med spa reach their goals of ranking high in Google,” Ogle said. “The best is yet to come.”
