

Coal Mining Support Activities Providers Are Increasingly Using High-End Technologies During Coal Exploration Processes

The Business Research Company's Coal Mining Support Activities Global Market Report 2021

LONDON, GREATER LONDON, UK, June 16, 2021 /EINPresswire.com/ --

Companies providing support activities for coal mining are using technologies such as Remote Sensing, GIS, GPS, Digital Photogrammetry, LiDAR during the coal exploration processes. High resolution satellite data is used in regional geological mapping as well as for locating the potential coal bearing area for detail exploration. In India CMPDI is using the satellite data from LISS-III, LISS IV, Carto I & II, IKONOS, WorldView-2, ASTER, Landsat 8 and RISAT for their coal exploration projects in India.

The [global coal mining support activities market](#) is expected to grow from \$33.69 billion in 2020 to \$37.25 billion in 2021 at a compound annual growth rate (CAGR) of 10.6%. Coal mining support activities market growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$43.31 billion in 2025 at a CAGR of 4%.

Asia Pacific is the largest region in the global coal mining support activities market, accounting for 46% of the market in 2020. Western Europe is the second largest region accounting for 35% of the global market. Middle East is the smallest region in the global coal mining support activities market.
