The coal market consists of sales of coal by entities (organizations, sole traders and partnerships) that mine bituminous coal, anthracite, and lignite coal by underground mining, strip mining, culm bank mining, and other surface mining techniques. The coal mining industry also develops coal mine sites, and improves coal, including cleaning, washing, screening, and sizing of coal.

## Trends In The Global Coal Market

Coal mining companies are using 3D mine visualizers to obtain a real-time digital model of a mine. A 3D mine visualizer generates a three-dimensional model of the mine layout and transfers it directly to the operator. 3D mine visualizers significantly enhance the productivity of large mining environments. Companies such as Sandvik and Komatsu are offering 3D visualizer systems to the coal mining industry.
