Yard Cleanup

## DIY Tips To Get Your Yard Back Into Shape:

Start by removing any unwanted items, including furniture and debris. Yard debris that builds up in your yard not only can be an eyesore, but it can also attract unwanted bugs and rodents. As for furniture, if your old furniture is ready to replace, try donating or selling it to clear some space!

Another great way to make your backyard look amazing is by implementing some landscaping! Plant a tree or shrub that is native to your area. This will keep the yard cooler and provide plenty of shade if you have an outdoor sitting space. You should also consider adding some flowers, like petunias, in spaces around your home for color and beauty! Flowers don't just make a backyard more attractive; they also offer a place for pollinators to live and reproduce. Pollinator populations are quickly decreasing, so making your backyard friendly for these little creatures is essential! Make sure all of the weeds are pulled so that what you plant has all the space it needs to grow strong and healthy.

The last DIY tip we have to make your patio or backyard look great is to add some decorations.

We recommend adding a few colorful and fun pieces of furniture like chairs or benches. Add some potted plants to your patio, but make sure they are low-maintenance ones that will thrive in the hot Arizona climate. Hanging string lights in the backyard will give the area the last finishing touch to look picture perfect.
