RMC Gems is the largest Paraiba Tourmaline manufacturer, purchasing directly from Mozambique mines which provides a lower supplier cost.

Unearthed just 20 years ago, Paraiba Tourmaline is the top sensation of the Tourmaline family and a true gemstone superstar. It's the neon-bright glow from within that makes the Paraiba incomparable to any other stone. A rarity, there is only one Paraiba tourmaline mined for every 10,000 diamonds. And as with anything scarce, beautiful, and in demand, its value reflects its notoriety.

The standard four 'C's are crucial when purchasing gems and diamonds. These are known as Carat, Cut, Clarity, Colour.

Color, The color of a gemstone is significant when determining its quality. Shoprmcgems.com carries gemstones with the best color quality in terms of hue position, saturation, and tone.

Clarity Our gemstones have no clarity defects. They are rich in cleanliness showing genuine features to the naked eye.

Cut, The cut on all our gemstones helps to display the beauty without taking away from the quality.

Carat Weight, Our gemstones are priced in respect of carat weight while still being affordable for the specific piece.

Enhancements, While still upholding the natural creation, our gemstones are professionally enhanced to improve each specific piece's appearance, durability, and value.

#1. Durability, This is one of the essential characteristics of a gemstone. The ability to endure is more than just a hardening over time. It's the durability of qualities that make a magical stone.

#2. Rarity, A wide-ranging collection; there are multiple levels of rarity for each. Many customers prefer a rare gemstone that holds significance, which few others may retain.

#3. Acceptability, Being acceptable in today's fashion trends is essential to selling our gemstones. While fashion trends are constantly developing and changing, our gemstones are sure to remain timeless.
