The transdermal skin patches market consists of sales of transdermal skin patches products and related services used to provide medicine to the human body through patches. Transdermal skin patches involve the use of adhesive patches made up of polymers that contains drugs. The drugs from these patches are absorbed into the body and eventually into the blood stream eliminating the drug delivery through pill, or injections.

Trends In The Global Transdermal Skin Patches Market

Major companies in the market are increasingly opting for acquisitions and collaborations to enhance and expand their footprint for the growth of the transdermal skin patches market. The strategic merger and acquisition and collaboration followed by the players in the transdermal skin patches market allows the companies to take technological advantage by acquiring the technology which allows them to get ahead in the competition. For instance, in 2019, Canoa Inc., a Delaware based healthcare and pharmaceuticals company, acquired ProSolutus® Inc. To enhance its position and development of new products in transdermal space. ProSolutus headquartered in

the USA is a pharmaceutical company that provides transdermal solutions. Similarly, in 2019, Mylan, a pharmaceutical company providing transdermal skin patches, with Upjohn, a subsidiary of Pfizer announced the formation of a new company named Viatris. The aim of the new collaboration is to provide more innovative medicines to the patients globally. Pfizer is a multinational pharmaceutical company. Thus, companies operating in the transdermal skin patch market are following the strategic collaborations and acquisitions to have a competitive edge.
