> Activities of end-users on the platform mirror the trends in the energy sector as a whole."
>
> *Report*

TechnologyCatalogue.com, the fastest-growing technology platform for the energy transition, marked its third year anniversary with unprecedented growth in registrations and platform activities.

In a report published in June, TechnologyCatalogue.com revealed the most common themes, most popular keywords and most searched technologies on the platform in the last three years.

"Activities of end-users on the platform mirror the trends in the energy sector as a whole. For instance, digitalisation and renewable energy being popular themes reflects the increasing indispensability of digitalisation as a business model and the inevitable journey towards clean energy sources, respectively," the report said.
Aside from a platform that gives end-users a direct access to intelligently curated technologies from around the world, TechnologyCatalogue.com has also exposed a viable, efficient and affordable long-term alternative to physical exhibitions for technology suppliers to take advantage of.

"TechnologyCatalogue.com has grown to be more than just a listing website for technologies in the energy sector but a platform of choice for energy companies finding technological solutions for their business," the report concluded.
