

Clean Energy Stock Foothills Exploration (\$FTXP) ANNOUNCES ELIMINATION OF MORE THAN \$1.6M OF O/S CONVERTIBLE DEBT

Foothills Exploration, Inc. (OTC: FTXP) announces settlement agreements with and/or repayment with all but one of its variable-rate convertible noteholders.

LOS ANGELES, CALIFORNIA, UNITED STATES, June

24, 2021 /EINPresswire.com/ -- Breaking

energy/cleantech stock news from Investorideas.com – Foothills Exploration, Inc. (OTC: FTXP), including its direct and indirect subsidiaries, ("Foothills," or the "Company"), an oil and gas exploration company, is pleased to announce that the Company has reached settlement agreements with and/or repaid and retired convertible promissory notes with all but one of its variable-rate convertible noteholders.

Balance Sheet Initiatives:

For the remainder of 2021, the Company's intended strategy is to settle and eliminate its outstanding variable rate convertible debt to clean up its balance sheet and better position itself for future growth.

To that end, the Company has reached settlement and mutual release agreements with and/or repaid and retired convertible promissory notes with all but one of its variable-rate convertible noteholders. Over the past 100 days, the Company has paid \$1.6 million to retire 10 variable-rate convertible promissory notes.

"This is a significant accomplishment, which positions the Company for tremendous future growth," commended Kevin J. Sylla, Executive Chairman of Foothills. "Management is making good on its promise to take steps to avoid future shareholder dilution and taking strong action to reduce or completely eliminate toxic debt and future dilution risk for our shareholders. This colossal step prevents several billions of shares from coming onto the market," continued Sylla.

The Company notes that all of its outstanding capital obligations to its convertible noteholders were subject to conversion at a significant discount to the stock's current trading price. However, as a result of the Company's move to eliminate these obligations, no related conversions will

take place. In place of the variable rate convertible notes, the Company has taken on several fixed rate convertible notes from the same lender with a conversion price set above the market, which it plans to refinance prior to maturity.
