

Kovair Software and Logic Technology Significantly Improve Efficiency and Value with Integrated Development Toolset

Achieve interoperability between tools, processes and people by integrating tools of your choice.

WESSEM, THE NETHERLANDS, EUROPE, June 24, 2021 /EINPresswire.com/ -- Kovair Software, a Silicon Valley software product company specializing in the domain of Integrated software tools supporting global product development and management has disclosed their [partnership with Logic Technology](#), one of Europe's leading providers of embedded development solutions, tools and software components.

Kovair Omnibus Integration Platform is the only multi-vendor ALM/SDLC tools integration technology that is based on the Enterprise Service Bus

(ESB)Architecture. Serving as the single data-repository of all essential ALM/SDLC services such as collaboration, traceability, process automation, security, reporting and analytics, Kovair Omnibus integrates multiple tools for multiple functions using tool-specific Kovair Adapters. It currently offers 110+ such integrations off the shelf.

"When using software tools from different vendors, chances are these tools are not communicating as effectively as you would expect to see. This means that more manual labour is required in order to keep these tools working together as they should.", says André De Ceuninck, product manager at Logic Technology. "By using Kovair Software's Omnibus integrated tool suite, developers can save a lot of time, money and stress, as the system always keeps itself in check. No more extra licenses or manual data transferring, everything is automated. The software comes with all the analytical tools and dashboards that one needs, so you can get a
