

Global IVF Services Market Trends, Strategies, And Opportunities In The IVF Services Market 2021-2030

The Business Research Company's IVF Services Global Market Report 2021: COVID 19 Growth And Change To 2030

LONDON, GREATER LONDON, UK, June 25, 2021 /EINPresswire.com/ --

According to the new market research report 'IVF Services Global Market Report 2021: COVID 19 Growth And Change To 2030' published by The

Business Research Company, the global IVF services market is expected to grow from \$12.92 billion in 2020 to \$14.34 billion in 2021 at a compound annual growth rate (CAGR) of 11%. The growth is mainly due to the companies resuming their operations and adapting to the new normal while recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$22.86 billion in 2025 at a CAGR of 12%. The rising infertility rate contributed to the growth of the [in vitro fertilization \(IVF\) services market](#).

The IVF services market consists of sales of in-vitro fertilization (IVF) services by entities (organizations, sole traders and partnerships) that provide these services. IVF is one of the more widely known types of assisted reproductive technology used to address infertility. IVF is a process of fertilization where an egg is combined with sperm outside the body, in vitro ("in glass"). Only goods and services traded between entities or sold to end consumers are included.

Trends In The Global IVF Services Market

Platelet-rich plasma (PRP) is the latest technique increasingly used for improving IVF success rate in patients with recurrent implantation failures. PRP is used alongside fertility treatments like IVF to improve the egg quality, uterine lining thickness and endometrial receptivity, and the

treatment is primarily for the recurrent implantation failure over multiple IVF cycles. According to an article published by the Journal of Assisted Reproduction and Genetics, women treated with PRP experienced a significant improvement in Follicle-Stimulating Hormone (FSH), Anti-Müllerian Hormone (AMH) and Antral Follicle Count (AFC) and help improve fertility.

Global IVF Services Market Segments:

The global IVF services market is further segmented based on cycle type, service provider, end user and geography.

By Cycle Type: Fresh IVF Cycles (Non-donor), Thawed IVF Cycles (Non-donor), Donor Egg IVF Cycles
