According to the new market research
report 'Communications Hardware
Global Market Report 2021: COVID-19

Impact And Recovery To 2030' published by The Business Research Company, The global [communications hardware market](#) is expected to grow from \$625.11 billion in 2020 to \$666.53 billion in 2021 at a compound annual growth rate (CAGR) of 6.6%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$900.88 billion in 2025 at a CAGR of 8%. The communications hardware market is expected to be aided by rapid growth in investments in smart city projects in many countries globally.

Trends In The Global Communications Hardware Market

Rapid increase in energy consumption has been a major threat to environmental protection and sustainable development, thus driving the development of green technologies in the industry. Communications hardware accounts for about 2%-4% of the total global carbon emissions. Due to access to the high-speed internet provided by next-generation wireless networks and increased smartphone usage, data traffic has increased significantly. This has triggered a significant expansion of network infrastructures and increased the energy demands. Environment friendly batteries, renewable energy sources, and intelligent management of the power systems are being developed to reduce carbon emissions.
