Visio P&ID Process Designer 2021 is Released

ITandFactory GmbH announces the release of Visio P&ID Process Designer 2021 (VPID 2021) - A Cutting-edge cost effective Solution for creation of Smart P&ID's
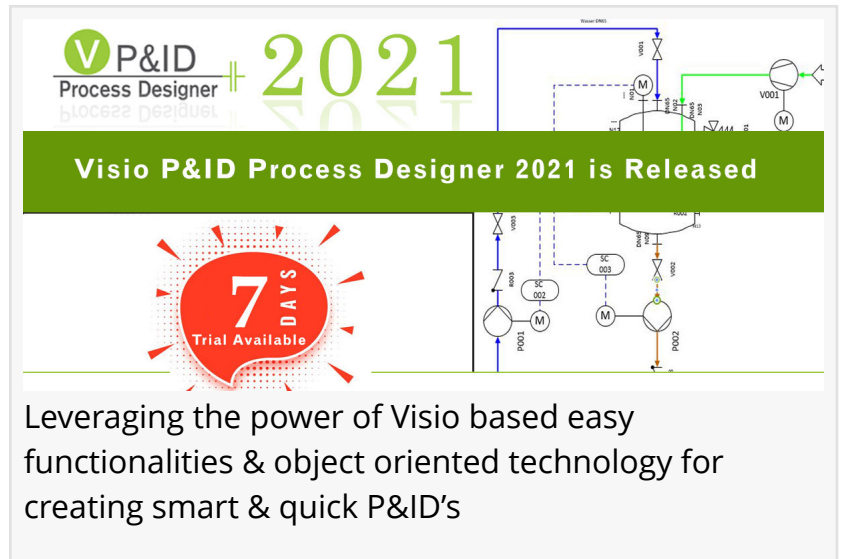

DETROIT, MICHIGAN, USA, July 1, 2021 /EINPresswire.com/ -- ITandFactory GmbH (ITF) announces the release of Visio P&ID Process Designer 2021 (VPID 2021) with a vision to provide an enhanced yet cost-effective, automated and easy-to-use solution for the creation of smart and quick

Leveraging the power of Visio based easy functionalities & object oriented technology for creating smart & quick P&ID's

PIDs and PFDs. VPID 2021 is a perfect solution for the Process industry with enhanced functionalities on Microsoft Visio® based platform and object-oriented technology fused with intelligent and automatic features for improving productivity for Process designers.

According to Ajit Joshi, ITF's managing director "This year has been an interesting one with people and businesses getting accustomed to the new normal and eventual opening of markets around the world. With a rapid shift in the way of working, we could clearly see a huge need for a solution in the process industry, which is easy to use, automated & intelligent and yet cost-competitive." Even in these challenging situations, ITF achieved a tremendous year-on-year growth by breaking new grounds and capturing more market share by expanding its footprints worldwide. Now VPID has been acknowledged as one of the best Easy to use, Cutting-edge yet cost effective solution for the process industry by many of its esteemed users.

The VPID team carefully analyzed the recent market shift and understood the need of the hour for their users. Thus ITF came up with a completely new and modern version of Visio P&ID Process Designer, VPID 2021, with new features, improved efficiencies and flexibility while not deviating from core philosophy of strengthening their user's business without compromising on affordability.
