

# Registration are now open for Counter UAS Technology 2021

*Announcing the first ever Counter UAS Technology Conference – Brand new to SMI's portfolio*

ARLINGTON, USA, July 2, 2021  
/EINPresswire.com/ -- Registration are now open for Counter UAS Technology 2021

Announcing the first ever Counter UAS Technology Conference – Brand new to SMI's portfolio

SMi Group's Counter UAS Technology Conference will convene on the 6th – 7th December in Arlington, USA.

Brand new to SMI's portfolio, this two-day event will focus on the very latest C-UAS technology in the market to ensure that DoD personnel, equipment and infrastructure are protected from the proliferation of hostile drones.

With the establishment of the US DoD Joint Counter-Small Unmanned Aircraft Systems Office, (JCO) there is now a drive across the US Armed Forces to have a comprehensive and centralised approach to tackling the ever-evolving [drone](#) threat facing the nation.

Why we are hosting this event?

In early 2021, the US Department of Defence released the 'Counter-Small Unmanned Aircraft Systems Strategy' outlining the creation of a new Office dedicated to combatting UAS (the JCO).

The Strategy demonstrated that the threat from UAS is becoming a more significant defence issue within the military and federal agencies and within the US there are more C-UAS projects being funded and developed. As all branches of the US military are developing C-UAS technologies to protect their forces, we saw the value in making this inaugural conference a USA focussed event.

Interested parties can save \$100 using the early bird discount by registering before 30th September at [www.counter-uas-tech.com/PR1/EINPRESSWIRE](http://www.counter-uas-tech.com/PR1/EINPRESSWIRE)

Why should a delegate attend 2021's event?

- Hear from US DoD Senior Leadership and Program Managers on how they are utilizing technology to combat UAS
- Meet and Network with international speakers from NATO and aligned nations to discover how they are defending their defence networks from drone attacks
- Listen to how innovative technology is driving advancement and enabling defence to counter drone swarms and attacks

Speakers will feature from leading US DoD agencies, international defence organizations and leading industry providers.

For the full speaker line-up, the brochure is available to download online at [www.counter-uas-tech.com/PR1/EINPRESSWIRE](http://www.counter-uas-tech.com/PR1/EINPRESSWIRE)
