

TECTONICBEATS Crafts Ornately Original Songs of Epic Scale with New Singles from the Upcoming NIGHTINGALE EP

SAN FRANCISCO, CA, USA, July 3, 2021 /EINPresswire.com/ -- TectonicBeats is an American composer, music producer, and artist. He is set to release his first series of groundbreaking original singles throughout July 2021, which will then be collectively titled the NIGHTINGALE EP and released with additional bonus

material shortly thereafter in August. These new tracks from TectonicBeats are an exploration of sound born out of the spirit of music and the power of technology. Known by his followers as “the synthmaster,” and for his hybridization of genres and expressive polyphonic composition, TectonicBeats is an earthquake and it’s off the Richter scale.

Born as Will Carney, TectonicBeats was conceived while Will was attending the electronic music production school Pyramind in San Francisco. He began selling his instrumental beats online and working with artists around the world including Destorm, Babatunde, and BrookInn. Inspired by the new era in music, TectonicBeats began collaborating with labels, producers, and singers across genres from K-pop to hip hop and EDM.

In 2017 while in Los Angeles, TectonicBeats wrote and produced an instrumental EP and solo album. Then just prior to the onset of the Covid-19 pandemic in 2020 he relocated his studio to Arizona and began collaborating with Australian singer BrookInn. These sessions resulted in all three singles that now comprise the new NIGHTINGALE EP release, a project that sees TectonicBeats weave a delicate narrative seamlessly together with colossal themes to create a vast work of art.

The title track “NIGHTINGALE” releases as a single on July 2, 2021, and is a vibrant, triumphant, and epic song that tells the story of a small hero you’d never expect and their story of survival. A story as old as time with a modern pop sound, the track takes the listener on a voyage to somewhere they’ve never been.

A hard-hitting pop song with a sensitive side, the next single “ROSEMARY” releases July 16.

Delightful melodies on top of a sensational beat make this song a powerful experience. With "Rosemary," TectonicBeats explores new musical terrain boldly and playfully in ways that reimagine everything.

The last single in the series "EXEMPLAR" releases July 30 and delivers an electric and psychedelic experience full of the sound of love and light. Following the release of "Exemplar," TectonicBeats will assemble the tracks along with some additional material into the NIGHTINGALE EP, set for release in August 2021.

TectonicBeats crafts songs of epic scale, ornately original and striking to the imagination. Get ready for a kaleidoscope of stimulation and a universe of creativity when TectonicBeats hits the scene in the summer of 2021!

"It's on the money." - Record Producer Joel Diamond

"This is great stuff." - Al Gomes at BigNoise

"I really love the direction TectonicBeats is going." - DJ Max Vangeli
