

Global Genito-Urinary Drugs Market Trends, Strategies, And Opportunities In The Genito-Urinary Drugs Market 2021-2030

The Business Research Company's Genito-Urinary Drugs Global Market Report 2021: COVID-19 Impact And Recovery To 2030

LONDON, GREATER LONDON , UK, July 6, 2021 /EINPresswire.com/ --

According to the new market research report 'Genito-Urinary Drugs Global Market Report 2021: COVID-19 Impact

And Recovery To 2030' published by The Business Research Company, the global [genito-urinary drugs market](#) is expected to grow from \$49.24 billion in 2020 to \$53.78 billion in 2021 at a compound annual growth rate (CAGR) of 9.2%. The growth is mainly due to the companies rearranging their operations and recovering from the COVID-19 impact, which had earlier led to restrictive containment measures involving social distancing, remote working, and the closure of commercial activities that resulted in operational challenges. The market is expected to reach \$63.95 billion in 2025 at a CAGR of 4%. The aging population profile of most countries contributed to the growth of the gastrointestinal drugs market.

Genito-Urinary Drugs Global Market Report 2021:
COVID-19 Impact And Recovery To 2030

The genito-urinary drugs market consists of sales of genito-urinary drugs and related services by entities (organizations, sole traders and partnerships) that produce genito-urinary drugs to treat genito-urinary diseases such as urinary tract infections, male reproductive diseases, voiding diseases, female reproductive diseases, glomerular disorders, urinary calculi, cystic kidney disease, Reno vascular diseases, benign prostate diseases, and other related diseases. This industry includes establishments that produce infertility drugs, hormonal contraceptives, erectile dysfunction drugs and hormonal replacement drugs to treat infertility, infections and prevent pregnancy. It also consists of establishments which produce drugs for benign prostatic hypertrophy, drugs for urinary incontinence and overactive bladder, diuretics to treat urinary calculi, glomerular disorders and other urinary disorders.

Trends In The Global Genito-Urinary Drugs Market

Pharmaceutical companies are investing in development of new class drugs for treating overactive bladders (OAB). Earlier anti-muscarinic agents have been used for the treatment of OAB. Going forward, the market is expected to be driven by a new class of drug known as beta-3 adrenergic agonists that has been increasingly used to treat OAB. Beta-3 adrenergic agonists are drugs which cause the bladder muscles to relax without causing side effects such as dry mouth.
