

# Contain Inc Announces Finance Arrangement with Edible Beats for FarmBox Foods Container Farm

*Contain Inc announces a financing agreement arranged between Edible Beats Restaurant Group & a prominent lender for a FarmBox Foods container farm.*

RENO, NV, UNITED STATES, July 7, 2021 /EINPresswire.com/ -- [Contain](#) Inc is pleased to announce a financing agreement arranged between [Edible Beats](#) Restaurant Group and a prominent lender for a controlled-environment container farm, [FarmBox Foods](#). Edible Beats is a locally owned Denver-based restaurant group known for its diverse menus and healthy, plant-based dishes that highlight local and seasonal ingredients. Edible Beats will be able to grow herbs, leafy greens, salad greens, and various produce organically and year-round with the container farm that will be attached to their Vital Root location.

“We have always sought opportunities to be more responsible to the sourcing, growing, and handling of the incredible ingredients that we get,” said Justin Cucci of Edible Beats Restaurant Group. “With the FarmBox Food container, we can grow hyper-local, organic, year-round produce that will be featured at all of our restaurants. We feel this is just the beginning of what we can grow, and we are eager to add the mushroom grow operation in the future”

Edible Beats purchased the container from FarmBox Foods, a Colorado-based company that builds automated farms that grow gourmet mushrooms, leafy greens, and culinary herbs. To FarmBox, controlled-environment agriculture is the future, and this deal is one of many leading us towards a more decentralized and eco-friendly food system.

"I think we're going to see a lot more of these types of programs going forward," said Chris Michlewicz, Chief Public Relations Officer at FarmBox. "Restaurants are realizing that their produce is fresher and has a longer shelf life when they have a container farm on site. It's a reliable and sustainable source of food, and it's more eco-friendly because you no longer have to transport food in from elsewhere."

Likewise, Contain Inc is thrilled to support Edible Beats as it ventures into indoor ag. "We're delighted to have assisted SemiMojo and FarmBox Foods in this innovative initiative. Contain is always excited to see more fresh food made available to consumers.

Customers appreciate freshness and quality produce, year round. Restaurants and container farms make this possible", said Doug Harding, Head of Leasing & Vendor Relations at Contain Inc. "We are thrilled to have collaborated with Edible Beats and Farm Box Foods on this project. It aligns perfectly with Contain's mission of supporting the controlled environment agriculture industry in its financing needs".

“

With the FarmBox Food container, we can grow hyper-local, organic, year-round produce that will be featured at all of our restaurants. We feel this is just the beginning of what we can grow"

Restaurant Group*

The container farm is being built and customized for Edible Beats, and will produce ingredients for all of the EB concepts, Linger, Root Down, Vital Root, El Five, and Ophelais.

About Contain Inc

Contain is out to empower the indoor ag industry of tomorrow. Our first and key mission is bringing easier and faster financing to controlled environment agriculture, but

we aren't stopping there. We create platforms to move the industry forward, and most importantly, find ways to make indoor ag more accessible to farmers of all stripes.

## About FarmBox Foods

FarmBox Foods was founded to help provide a sustainable, eco-friendly food source to places where there is a lack of access to farm-fresh produce. The company's mission is to use container farms to decentralize the food supply chain and empower local communities.
