

More Than 450 Biofuels Producers Set to Attend the International Fuel Ethanol Workshop & Expo Next Week

Produced by BBI Intl., the 37th Annual FEW has more than 300 exhibitors and 150 speakers registered for the conference in Des Moines, IA, July 13-15th.

DES MOINES, IOWA, UNITED STATES, July 9, 2021 /EINPresswire.com/ -- The [2021 International Fuel Ethanol Workshop & Expo \(FEW\)](#), the ethanol industry's largest conference, will feature more than 150 speakers, next week, July 13th-15th, in Des Moines, Iowa at the Iowa Event Center. Now in its 37th year, the FEW will provide the global ethanol industry with cutting-edge content and unparalleled networking opportunities in a dynamic business-to-business environment. The FEW has and will continue to be the largest, longest running ethanol conference in the world—and the only event produced exclusively by [Ethanol Producer Magazine](#).

In addition to the main program agenda, the conference will include two pre-conference events and two co-located events. The two pre-conference events are titled, "Ethanol 101" and the "Low Carbon Efficiency Summit." "Ethanol 101" serves as a one-day in-depth survey of the history, science, production, and market basics of the ethanol industry. The agenda includes some of the industry's most recognized professionals, and will provide a forum to meet and network with them. The "Low Carbon Efficiency Summit" is a day-long workshop that will include discussions about the technical aspects of driving down a plant's carbon intensity, as well as the processes required to properly document those efforts and strategies for marketing these carbon-reduced fuels to the market.

"Each year our staff is amazed at the innovation within this industry," said Tim Portz, program director at BBI International. "This year we had a very large number of abstracts submitted, which allowed us to produce four solid program tracks containing presentations from some of the industry's top minds, as well as two comprehensive pre-conference agendas."

This year's FEW in Des Moines is expected to draw nearly 2,000 attendees, including ethanol producers, biodiesel and renewable diesel producers, biomass and biogas producers, industry suppliers, service providers and researchers from around the world.

"We had a sense, but we weren't 100% sure how the show was going to play out this year, due to all of the unknown variables," said John Nelson, vice president of operations, marketing and sales at BBI International. "However, we currently have 301 exhibitors, which makes the number of companies exhibiting larger than we had in 2019. We are extremely happy with the number of companies wanting to share new technologies or services with the nearly 450 producers registered."

During the event, speakers will discuss issues categorized into four tracks and two co-located events:

Track 1: Production and Operations □
Track 2: Leadership and Financial Management
Track 3: Coproducts and Product Diversification □
Track 4: Infrastructure and Market Development
Biodiesel & Renewable Diesel Summit
National Biomass Conference Summit

Producers of ethanol, biodiesel, renewable diesel, biogas, RNG, biomass power and heat, pellets and advanced biofuels receive unlimited complimentary registrations to attend all sessions, including the pre-conference and co-located events.

Visit www.FuelEthanolWorkshop.com to view the agenda online.

About BBI International:

Founded in 1995, BBI International produces globally recognized bioenergy events and trade magazines. In addition to the International Fuel Ethanol Workshop & Expo, the largest, longest-running ethanol conference in the world – BBI International owns and operates the International Biomass Conference & Expo. The company publishes Biomass Magazine, Ethanol Producer Magazine, Pellet Mill Magazine and Biodiesel Magazine as well as a number of ancillary products including maps, directories, e-newsletters and other web-based industry resources.
