

Pesticide And Other Agricultural Chemicals Market Trends Include The Use Of Nanoparticles

The Business Research Company's Pesticide And Other Agricultural Chemicals Global Market Report 2021: COVID-19 Impact and Recovery to 2030

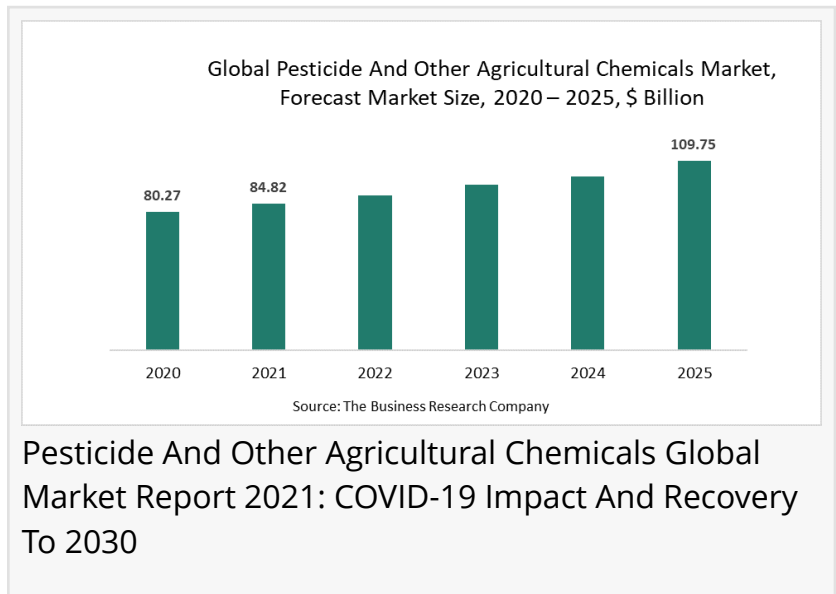

LONDON, GREATER LONDON, UK, July 9, 2021 /EINPresswire.com/ --

Toxicologists globally are adopting nanotechnology in the development of new, environmentally friendly insecticides. Nanoparticles have revolutionized the pharmaceuticals and chemicals industries. Pesticidal nanoformulations are ultrafine particles with enhanced permeability, stability, and solubility. Most engineers believe that nanotechnology can help make insecticides much safer. Nano sized insecticides can be sprayed in lesser amounts on agricultural fields in comparison with conventional forms. For example, Lansiumamide B (antibacterial) is formulated as nanocapsule to treat tobacco bacterial wilt. Thiametoxam (insecticide) is sprayed as nanoscaled fibre and Deltamethrin (insecticide) is formulated as a lipid nanoparticle.

TBRC's [pesticides industry analysis report](#) is segmented by type into herbicides, insecticides, fungicides, other pesticide and other agricultural chemicals, by origin into synthetic, bio-based, and by application into grains and cereals, pulses and oilseeds, commercial crops, fruits and vegetables, others.
