Leader in Online IT Training announces new training course for high-demand Google Cloud Certification

ITU Online recently released its brand new Google Cloud Platform (GCP) Certification Training course that is on-demand and available 24/7.

DUNEDIN, FLORIDA, UNITED STATES, July 12, 2021 /EINPresswire.com/ -- "Professional Cloud Architect was the highest paying certification of 2020 and 2019" according to Google. ITU Online worked diligently to produce the course instructed by expert Joseph Holbrook for IT professionals and prospects to elevate their professional skills and boost their salaries.

This course is for GCP beginners. Some prior experience would be helpful as this course does not extensively cover GCP 100 material.
The course is best suited for the following students:
•   Cloud Developers, Managers, Administrators, and Architects new to GCP
•   Solution Architects new to GCP
•   Programmers who wish to deploy applications in GCP
•   Anyone interested in hosting highly scaleable, fault-tolerant applications (such as WordPress and Joomla) on the GCP platform IaaS or PaaS

The elements that define DevOps operations and how it applies to GCP services are the essential components of this course. Major services related to deploying a CI and CD pipeline, along with a review of Kubernetes Engine, App Engine, and Cloud Functions, are also covered.

Founder and CEO Carrie Cameron adds, "According to a 2018 Global Knowledge survey, a GCP Cloud Architect is among the highest-paid with an average annual income of $139,529. Obtaining a Google Cloud certification or simply learning the skill sets for Google Cloud technology can provide tremendous prospects for your career and earnings potential."
