

RegScan Adds SASB Standards to its Sustainability Offering

RegScan, Inc. is pleased to announce the addition of SASB Standards to its RegScan Sustainability service.

WILLIAMSPORT, PENNSYLVANIA, UNITED STATES, July 13, 2021 /EINPresswire.com/ --

[RegScan](#), Inc., a trusted provider of global

compliance solutions for Environmental, Health, Safety & Sustainability professionals, is pleased to announce the addition of SASB Standards to its [RegScan Sustainability](#) service. RegScan clients could already subscribe to the following self-assessment tools on the following reporting frameworks: GRI Standards, Carbon Disclosure Project (CDP), Sustainable Development Goals (SDGs) as part of the UN Global Compact and ISO frameworks related to sustainability.

SASB Standards allow companies to identify, manage, and communicate sustainability information to their investors. The Value Reporting Foundation publishes SASB Standards to help organizations identify the minimal set of financially material sustainability topics and their associated metrics for the typical company in an industry. The SASB Standards have been published since 2018.

“RegScan is excited to add SASB Standards to our Sustainability content offering,” said Ned Ertel, President and CEO of RegScan, Inc. “Our collection of checklists, regulations, and notification tools makes our service the most robust in the industry and adding SASB Standards will benefit our clients focused on sustainability operations and activities.”

RegScan Sustainability is designed to support EHS&S professionals with sustainability reporting and regulatory challenges – whether the challenge is stakeholder reporting expectations, supporting ESG materiality assessments, or identifying impacts to the environment and local communities where their business operates. Through the [RegScan FLEX](#) platform or Environmental Management Information Systems (EMIS) partners, clients can expect regulatory updates and checklists to stay ahead of the latest changes to sustainability-related regulations and RegScan-covered frameworks.
