

Anblicks Config Driven Framework for Talend

Anblicks Config Drive Framework Powered by Talend is developed to cater to the need for realtime acceleration of ETL/ELT development & reduce maintenance costs.

SINGAPORE, July 14, 2021

/EINPresswire.com/ -- Anblicks will be hosting its latest webinar titled "[Anblicks Config Driven Framework \(CDF\) for Talend](#)" on July 27, 2021. The webinar will be presented by Adrian Lim (Director, Channels APAC, Talend), and Karthikeyan Jaganathan (Data Architect, BI & Integration, Anblicks).

Anblicks Config Driven Framework (CDF) is a simplified low code ETL framework, which helps you to add new data sources and data integration pipelines nearly automatically, requiring little or no input from developers. CDF improves performance by configurable task parallelization and provides insightful proactive operational dashboards to mitigate failures. CDF is powered by [Talend Data Fabric](#), which combines data integration, integrity, and governance in a single, unified platform.

During the webinar, the presenters will walk you through the data integration use cases of two large customers and the challenges, showcasing how Talend Data Fabric and Anblicks CDF addresses these challenges, demonstrate the features such as configurable workflow, advanced monitoring, and logging using the Power BI dashboard, explain the scalable and extensible architecture and showcase what it takes to implement and roll-out this low cost and high-performance solution.

"There is a fundamental shift and need in the industry to move towards using low code ETL frameworks. Anblicks Config Drive Framework Powered by Talend is developed to cater to the need for real-time acceleration of ETL/ELT development and reduce maintenance costs. The framework is light-weighted, highly scalable, really versatile, and high-performance in order to be able to deliver data faster to business." says Karthikeyan Jaganathan, Data Architect at

Webinar: Anblicks Config Driven Framework for Talend (APAC Edition)
