“

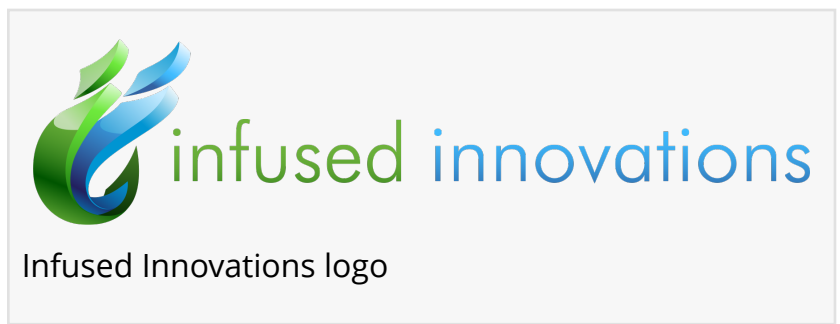

I started Infused Innovations because I was frustrated with the transactional nature of traditional technology services companies”

Jeffrey Wilhelm

Infused Innovations’ goal is to accelerate every organization’s ability to digitally transform by implementing “modern workplace” technologies, focusing mainly on security improvements in three key areas – modern authentication, data and device protection, and threat protection. Ultimately, Infused Innovations helps organizations to refine overall workflow, entire operations, and strategic automation. Jeff, as CEO of Infused Innovations, and an inspiring leader of a successful company, shares his journey with the magazine.

"I started Infused Innovations because I was frustrated with the transactional nature of traditional technology services companies, and the lack of ongoing relationships and strategic

engagement that I had seen," says Infused Innovations' CEO, Jeffrey Wilhelm. He continues, "So many small-to-medium businesses are hungry for strategic guidance, whether business, technical, security, etc., and don't have partners that want to help them in a holistic way. The relationships we have with our clients make every interaction feel more like a partnership than a transaction, and we thrive on that."
