

# Shaky Footage No More, The PowerVision S1 Is More Than 500% Funded

SAN FRANCISCO, CALIFORNIA, UNITED STATES OF AMERICA, July 20, 2021 /EINPresswire.com/ -- Shaky footage is a big no-no and this may affect the overall quality of video content. Unsteady hands is a normal human phenomenon and there are various tools that have been developed to eliminate this in the footage. Editing softwares may minimize the appearance of these, but using a gimbal would be the best bet to create cinematic-looking scenes. The PowerVision S1 offers an all-in-one solution, solving stabilization, charging, stand, and protection needs in a compact format. It's mini but powerful and a perfect companion for most smartphones.

The PowerVision Indiegogo campaign is wrapping up soon. Be an early backer and get [access to the PowerVision S1 exclusive rates](#).

The estimated shipping date for Indiegogo order will begin on July 20th.

Autofollow & Gesture Control

AI facial recognition and body tracking seamlessly detect the subject and follow it around. No need to activate the timer with easy hand signals to capture every shot on the perfect moment. The PowerVision S1 tracks individual faces, bodies, and even objects.

3X Smaller & Truly Pocket-Sized

This all-in-one smartphone accessory has the smallest micro three-axis gimbal in the world. If it's not on hand, then it fits compactly in any bag. It's made to go everywhere.

Not An Average Gimbal

Charge a mobile device and the PowerVision S1 at the same time with it's built-in power bank and pass-through wireless charging. Create charging options wherever and never run out of juice. The best thing? No more wires!

The **PowerVision S1**  
The perfect companion for smartphones
