

C.Q.R.D. Makes Crypto QR Storing Easy and Accessible

The C.Q.R.D. app stores receivable QR codes for easy access and viewing multiple accounts in one place.

TAMPA, FL, UNITED STATES, July 21, 2021 /EINPresswire.com/ -- Cryptocurrency has been gaining in popularity recently, so much so that there are a plethora of cryptocurrencies for every purpose imaginable. Users worldwide can use cryptocurrency for a wide variety of purposes, from sharing digital art to building a community online. With so many different options, it can become difficult for cryptocurrency users to keep track of and share multiple QR codes to access different wallets and accounts. The C.Q.R.D. code tackles this problem, allowing users to easily store QR codes and transfer between wallets and currencies.

The C.Q.R.D. app is helpful for users looking to transfer cryptocurrency between accounts, wallets, and people. Instead of having to sign on to each account individually and send QR codes, users can go to the C.Q.R.D. app to find all the codes they need in one place. The app is a cryptocurrency QR database that allows users to store their information easily and efficiently.

"So simple yet so effective. Saved me time you can't buy back, especially in a trading environment," said Cynthia a C.Q.R.D. user and cryptocurrency investor.

C.Q.R.D. is free to use, making it accessible to anyone. The app also includes a Pro version for more experienced investors, where users can use more crypto wallets or exchanges, and a variety of advanced features with no ads. The app is accessible on both cell phones and tablets, and users can use multiple devices to transfer between different parts of their own accounts.

The C.Q.R.D. app is the next wave in crypto technology, making it easier to use and trade cryptocurrencies, making the systems more accessible, and increasing the overall efficiency of the cryptocurrency space.

More information on the C.Q.R.D. app can be found on <http://www.cqrdb.com>. The app is available on the [Apple App Store](#) and the [Google Play Store](#).
