

Chlorinated Paraffin Market Drivers Include The Increase In Demand For PVC Pipes, Flooring

The Business Research Company's Chlorinated Paraffin Global Market Report 2021: COVID-19 Growth And Change

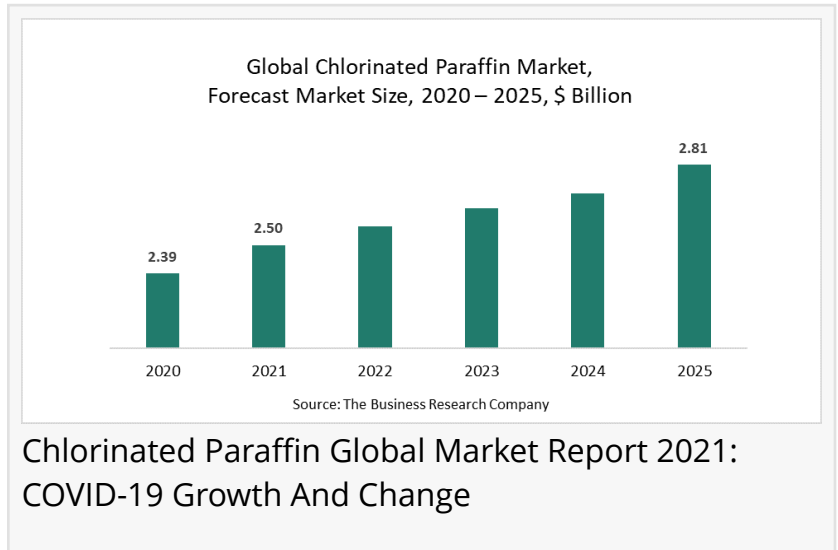

LONDON, GREATER LONDON , UK, July 22, 2021 /EINPresswire.com/ -- The increasing demand for the usage of PVC pipes and flooring is expected to drive the growth of the [chlorinated paraffin market](#). Chlorinated paraffin is used as secondary plasticizers for polyvinyl chloride (PVC) pipes, cables, paints, flexible CPVC pipes, and flooring, which are used in the construction industry. According to Invest India, National Investment Promotion and Facilitation Agency in India, the demand for PVC is growing in residential construction as the construction industry is expected to reach \$738.5 billion by 2022. Moreover, according to IIFL Holdings Limited, an India-based financial services company, the Indian plastic pipes industry size was approximately \$4.00 billion in 2019 with 60% demand from the agricultural sector and the remaining 40% from the construction sector. Thus, the growth of the construction industry is likely to generate higher revenues for the chlorinated paraffin market.

The global chlorinated paraffin market size is expected to grow from \$2.39 billion in 2020 to \$2.50 billion in 2021 at a compound annual growth rate (CAGR) of 4.74%. The growth in the chlorinated paraffin market is mainly due to the growing demand from end-user industries. The market is expected to reach \$2.81 billion in 2025 at a CAGR of 2.98%.
