The wood preservatives market consists of sales of wood preservatives by entities (organizations, sole traders, and partnerships) that manufacture wood preservatives that are used to protect the wood. Wood preservatives are chemicals that can control wood degradation problems due to fungal rot or decay, sapstain, molds, or wood-destroying insects. It is mainly used to increase the durability and resistance of wood, timber, wood structures or engineered wood.

Trends In The Global Wood Preservatives Market

Major players operating in the wood preservatives market are continuously investing in research and development (R&D) activities to manufacture eco-friendly wood preservatives which are a

key trend in the wood preservatives market. Considering the environmental rules and regulations, the wood preservatives manufacturers are developing natural or eco-friendly wood preservatives so that they will be less harmful to the environment. For instance, UltraPole NXT, developed by Viance, was awarded with R&D 100 2020 Award for its sustainable solution. The active ingredient DCOI (4,5-Dichloro-2-n-octyl-4-isothiazolin-3-one) does its job as a highly effective wood preservative. DCOI that enters the environment degrades rapidly.

Global Wood Preservatives Market Segments:

The global Wood Preservatives market is further segmented based on formulation, end user, application and geography.

By Formulation: Water Based, Solvent Based, Oil Based

By End User: Residential, Commercial, Industrial

By Application: Cabinets And Decks, Doors & Windows, Wood Flooring, Railroad Ties, Others

By Geography: The global wood preservatives market is segmented into North America, South America, Asia-Pacific, Eastern Europe, Western Europe, Middle East and Africa. Among these regions, North America is the largest region in the wood preservatives market in 2020.
